

## Powering your practice with advanced PM solutions.

---

SI Healthcare PM helps your practice achieve greater efficiency by streamlining day-to-day operations and adding accountability.

- Automated patient eligibility checks
- Tracking of all key measures (no shows, missed charges, denials, etc.)
- Daily progress and results are accessible from any Internet connected PC
- Audit tools by operator hold all team members accountable

### Executive Summary

SI Healthcare's Practice Management (PM) solutions are web-based applications that enable physician practices to achieve greater efficiency by:

- Streamlining front desk processes to eliminate redundancies
- Optimizing the "clean claims" percentage
- Monitoring provider contracts + payments
- Assessing and measuring staff and provider performance
- Providing robust, accessible reporting

### Overview

With built-in workflow rules, user alerts, and real-time reporting functionality, SI Healthcare PM systems deliver the flexibility needed to manage your practice effectively.

#### Boost Automation

With SI Healthcare PM tools, your practice can automate time-consuming administrative tasks, such as scheduling appointments, issuing reminders, checking eligibility, documenting patient visits, and submitting claims. In addition, decision support helps clients verify and validate the accuracy of information, maximizing cash flow.

#### Increase accuracy

The systems improve reimbursement and processing efficiency by reducing errors related to eligibility verification and incorrect coding. They also enhance billing and accounts receivable through prioritization, alerts, and easy access to information. Working with the tools in a highly structured process helps achieve lower costs and stronger results.

#### Secure but accessible

Application access is paid for via a predictable monthly fee, which means you don't have to invest resources in IT, hardware, or maintenance costs common to client-server setups. In addition, the systems are maintained and co-located at redundant HIPAA-compliant data centers. Whenever you have a PC connected to the internet and the correct permissions, you can access up-to-date status of your practice and individual accounts.

## Key Features

With SI Healthcare PM, you get the tools to power your practice.

This online application features a sophisticated infrastructure within a simple user experience that:

- **Automates patient scheduling and registration, verifying eligibility at every step**
- **Scrubs outgoing claims prior to submission, maximizing your “clean claims”**
- **Returns to payers to check claim status**
- **Monitors contracts for underpayment**
- **Routes issues to billing staff and managers, ensuring accountability at all levels**
- **Allows easy access from any web-connected device**

SI Healthcare’s innovative approach connects practices with key stakeholders, monitors your workflow with supportive knowledge and rules, offers an easy-to-use application experience, and provides support services.

## About SI Healthcare

SI Healthcare provides medical coding and billing services to physicians in sixteen states using state-of-the-art billing systems and EMRs.
